

Are you concerned about traffic? Do you need more or better options for getting around?

YOU CAN HELP SHAPE THE FUTURE OF TRANSPORTATION IN CALIFORNIA

The California Department of Transportation has joined the US Department of Transportation in conducting the National Household Travel Survey. From California's biggest cities to its smallest towns, from the southern beaches to the inland valley to the majestic northern redwoods, we need to know how people in all parts of our state choose to travel.

Your household has been randomly selected to take part in this very important survey. Two weeks ago we mailed a survey package to your home. We thank you if you have already filled it out and mailed it back. If not, you will receive another package in a few days.

We encourage you to participate because your opinion represents thousands of others in your community. The information we receive from you helps us to:

- Reduce congestion and make transportation by car, bus, train, walking and biking more efficient and accessible for everyone.
- Improve roads, sidewalks, bike paths and other infrastructure to better serve your community's needs.
- Help transportation officials make informed decisions on how and where to spend transportation dollars.
- Understand safety and environmental concerns in transportation.

We are asking for your help in providing information about your household travel. We take your privacy very seriously. All information collected will be held in the strictest confidence.

If you have any questions, please visit our website at www.NationalHouseholdTravelSurvey.com or call 1-855-350-6487 (NHTS) and our survey representatives will help you get started.

Thank you for your participation—we look forward to learning about your transportation needs!
