INTRODUCTION

Thank you for being part of the National Household Travel Survey. The US Department of Transportation conducts this study every 5 to 7 years to understand how to improve personal travel across the country.

In this stage of this study, each member of your household will be asked where, when and how you traveled to each of the places you went on [$TRAVDATE]. In addition, you will each be asked about work, school, and how you usually travel from place to place. We will also ask some general questions about your household and may ask you to confirm some of the information you gave us on the questionnaire you completed a few weeks ago.

Your participation is voluntary, and your answers will be confidential as required by law.

As a thank you, we will send your household a **$20 check** after everyone successfully completes the survey. Please call 1-855-350-6487 (NHTS) if you have any questions.

Before you get started, let's talk about what a PLACE is:

A place is any location you go to, no matter how long you are there. Examples include:

- A gas station
- A drive-thru window
- A building where you dropped someone off or picked someone up
- An off-site location for a meeting with a client

For example, the places David went on his travel day are numbered 1 -7 below:
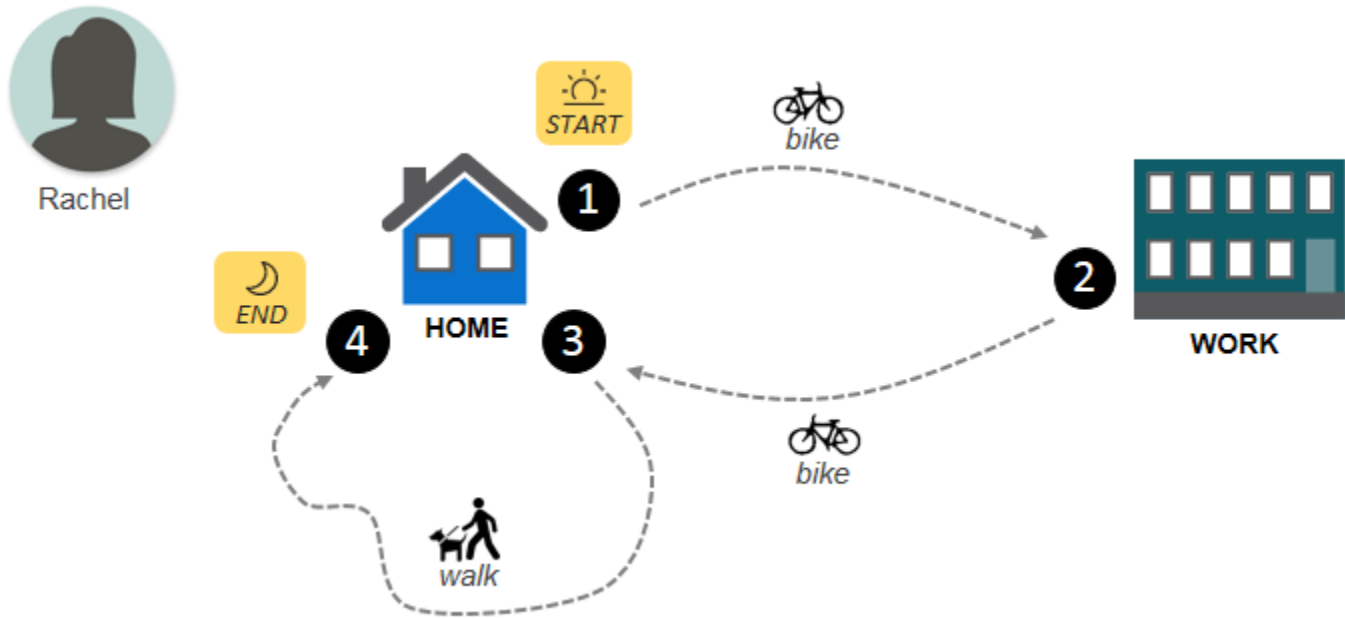

USEPUBTR_EXP
ProgrammerNote: Displayed if WEB

We're interested in your walks, jogs and bike rides too!

In the example below, Rachel went four places: (1) HOME, (2) WORK, (3) HOME and then back (4) HOME.

Notice how her home is marked multiple times. *That's correct!* Every time you go somewhere, it's a place.
